

Commercial Bark

A good value conifer bark mulch predominantly made from spruce. It is mid/light brown in colour with a slight but pleasant odour.

Graded using the Rudnick and Enners rotating trommel to remove 0-5mm fines and +50mm oversize.

Nominal 80% of product will pass through a 50mm and be retained on a 5mm sieve

Contains white wood, normally within 15% (by volume basis)

Moisture content in the region of 50 - 60% (green weight basis) on delivery.

Bulk density normally 200 - 350kg/m³.

The pH between 4.5 and 6.5

Hard wearing, long lasting and free from pests, pathogens and weed seeds.

Free of all foreign matter so as to comply with current legislation and our own strict standards.

Application Rates

We recommend that all our mulches are laid at a depth of between 50 & 100mm to obtain the best results. Allowing 10% for settlement.

Available in Bulk Loose.
