

# **Medium Amenity Mulch**

10-65mm

A semi ornamental bark with a large particle size making this ideal where long lasting course grade mulch is required.

Produced from mixed conifer bark with a high percentage of spruce. It is dark brown in colour with a woody smell.

90% of the particles fall in the range of 20-60mm

White wood content no greater than 20% by volume.

Moisture content in the region of 55-70% (green weight basis) on delivery.

The weight/volume ratio (bulk density) is normally in the range of 200-400Kg/m<sup>3</sup>.

The pH range is between 5.0 and 6.0.

Manufactured from materials sourced 100% within the British Isles, thus completely free of any trace of methyl bromide contamination.

Free of all foreign matter so as to comply with current legislation and our own strict standards.

Durable, long lasting and free from pathogens, pests and weed seeds.

## **Application Rates**

We recommend that all our mulches are laid at a depth of between 50 & 100mm to obtain the best results.  
Allowing 10% for settlement.

Available in Bulk Loose
