

Woodland Mulch

An economical alternative to bark made from composted woodchip ideal for landscaping applications on a budget.

Produced from soft and hard wood

Composted for a minimum of 6 weeks until all green is removed

The pH range is between 6.0 and 7.0

Manufactured from materials sourced 100% within the British Isles, thus completely free of any trace of methyl bromide contamination

0 - 40mm nominal particle size

Please Note: Due to the nature of this product and the screening process oversize pieces of wood may occur. However, these can easily be removed at the time of installation

Application Rates

We recommend that all our mulches are laid at a depth of between 50 & 100mm to obtain the best results. Allowing 10% for settlement

Available in Bulk Loose
