

# **Play Area Wood Fibre**

8 - 20mm

This attractive wood fibre is suitable for use with play equipment in all rural, urban and exposed sites.

## **Product Description**

Produced from a blend of hardwood and softwood species

Complies with BS EN 1176 industry standard.

Over 90% of particles range from 8-20mm in size.

Wood fibre content of 99%+

Fines content less than 5% (less than 8mm).

Free of all foreign matter such as large stones, plastic, glass and any other extraneous materials.

Hard wearing, long lasting and free from pests, pathogens and weed seeds.

The pH range is between 5.0 and 6.0.

Free draining and provides a clean play surface all year long.

## **Application Rate**

The application rate for play safety surfacing is dependent on the critical fall height (CFH) required.

Available in Bulk Loose
